

Intent to Offer Services

The nDanville community fiber network is currently in final testing, and we expect to be ready to begin connecting service providers to the network in August and September of 2007. Phase 2A of the project is designed to provide connectivity to Danville area businesses, including the regional incubator and several of the business parks. The City will not sell services to businesses and residents. Therefore, we are seeking service providers to offer and to sell a variety of services on the network.

If your firm is interested in offering services on the nDanville system, please check the services you might offer, sign below and return the form to Jason Grey, the nDanville project manager. For more information, visit www.ndanville.net.

Our company will consider offering the following service(s) on nDanville if our firm can make a business case for doing so:

- "Lifeline" Internet access (e.g. 128 kbit service)
- Residential Internet access packages 1 megabit 5 megabit 10 megabit > than 10 megabit
- Business/commercial Internet access 1 megabit 10 megabit 25 megabit 100 megabit
- Television programming packages (i.e. equivalent to typical cable and satellite offerings)
- Computer/data backup services Residential Business
- IP-based security monitoring services Residential Commercial/business
- Gaming packages (high performance Internet access)
- Voice over IP telephone services Residential Commercial/business
- Other IP-based services (specify) _____
- Other IP-based services (specify) _____
- IP-based services (specify) _____
- We have fiber, duct, collocation facilities, or other hard assets we would be interested in selling or leasing to the project.
- We would like to donate space and/or other assets to the project for the benefit of the community.
- Please include us on the service provider mailing list
